## Bollom Fire Tests

### 1. Combustible (wood) Surfaces

Finish	Class	System	m <sup>2</sup> /litre	Number of coats	Fire Test Certificate Numbers (BS476 pt6 and pt7)
Gloss	0	Broflame Ultra Basecoat	5	2	EWF 312640 / 312639
		Flameguard Ultra Gloss Topcoat	14	2	
Acrylic Eggshell	0	Broflame Ultra Basecoat	5	2	EWF 312641 / 312638
		Flameguard Ultra Acrylic Eggshell Topcoat	12	2	
Vinyl Matt	0	Broflame Ultra Basecoat	5	2	EWF 312642 / 312637
		Flameguard Ultra Vinyl Matt Topcoat	12	2	

Fire tests were carried out on 12mm particle board. Particle board is considered to be the worst case scenario in terms of spread of flame and heat release, in comparison to other wood types.

The Bollom brand has been associated with fire protection coatings technology since its conceptual stage in the early 1970s when the company (then known as J.W. Bollom & Co) acquired a very early intumescent for structural steel from France. It then went on to manufacture the first textured, solvent based intumescent. Since then the range has grown into one of the most comprehensive on the market including decorative coatings not only for structural steel but also internal walls and ceilings, external and internal wood and wood veneer. All of Bollom's Intumescent Coatings for structural steel have been fully fire tested BS476:Part 20/21:1987 ASFP Approved.

We offer a technical advice and specification service with on-site support if required. Certificates of Conformance and Installation are supplied with every purchase, and can be requested by the architect, main contractor, quantity surveyor or building control officer. Tor Coatings has ISO 9001 accreditation and is a member of the British Coatings Federation.

### How do I get Fire Certification?

It's simple, just keep proof of purchase, batch numbers of the products used along with site details and contact our Customer Services Department on **0191 410 6611** with the information and they will send you the relevant Certificate of Supply within 5 working days.
